

# M180/M181 A180/A160

## Investing in our road network

## We'll be working on the M180

**At Highways England we believe in a connected country and our network makes these connections happen.**

We strive to improve our major roads and motorways – engineering the future to keep people today and moving better tomorrow. We want to make sure all our major roads are more reliable, durable and, most importantly, safe and that's why we're investing more than £5 million improving our network in this area.

We're carrying out a range of improvements along the M180, M181, A180 and A160 over the next 12 months to ensure we make the road safer and provide better journeys for drivers and residents.

By improving safety and creating smoother journeys we'll create better links for those travelling to the Port

of Immingham which plays a key role in the long-term growth of the economy and provides essential access to global markets.

Our improvements include vital repairs to the surface on the M180 and A180, bridge maintenance and improvements to junction 5 of the M180.

We're working closely with North Lincolnshire Council to unlock jobs and homes in the Scunthorpe area. The Lincolnshire Lakes development one of the largest residential developments, not just in Yorkshire and the Humber region but in the whole of the UK and will create new homes, a business park and office accommodation.

A new M181 junction will be created to improve access routes to the motorway and make the area more accessible as a place to live, visit and work.

## We're working closely with North Lincolnshire Council to unlock economic growth on the M181.

Work is due to start on a £4.5m highway scheme that will open up the opportunity to employment and housing growth whilst easing congestion on the road network in North Lincolnshire, particularly at Berkeley Circle.

Work will start in June to create a new roundabout on the M181 that unlocks 60 acres of land for commercial development, enables the building of new homes and eases congestion in North Lincolnshire. The new junction will also act as a bypass for Burringham village.

The new junction will connect to a new east to west link road between the M181 and Scotter Road. This is a key milestone of the Lincolnshire Lakes development that will support transformation of North Lincolnshire's economy.

The scheme has been funded by Government cash through the Greater Lincolnshire Enterprise Partnership (GLLEP) as part of their plans to grow Lincolnshire's economy.

This is part of a bigger scheme that will see another roundabout built by Highways England at the northern end of the M181 connecting it to Burringham Road. The M181 will then be detrunked and will no longer be a motorway.

Councillor Rob Waltham, Leader of North Lincolnshire Council, said: "This is a key milestone in the Lincolnshire Lakes development allowing access to land for commercial development creating jobs and new homes.

"The investment in the infrastructure will provide the green light for the development as a whole.

"Lincolnshire Lakes is a game changer for North Lincolnshire's economy and will be a catalyst for the regeneration of the area.

"The new junction will also ease congestion in North Lincolnshire, particularly at Berkley Circle.

"With construction companies facing difficult times now is the right time for the council to invest in the infrastructure of North Lincolnshire - protecting jobs now and at the same time building for the future."

Pat Doody, chair of the Greater Lincolnshire LEP, said: "We are delighted to be investing £4.5m in this crucial infrastructure scheme, which will enable access to 600 acres of land for development of housing and employment use.

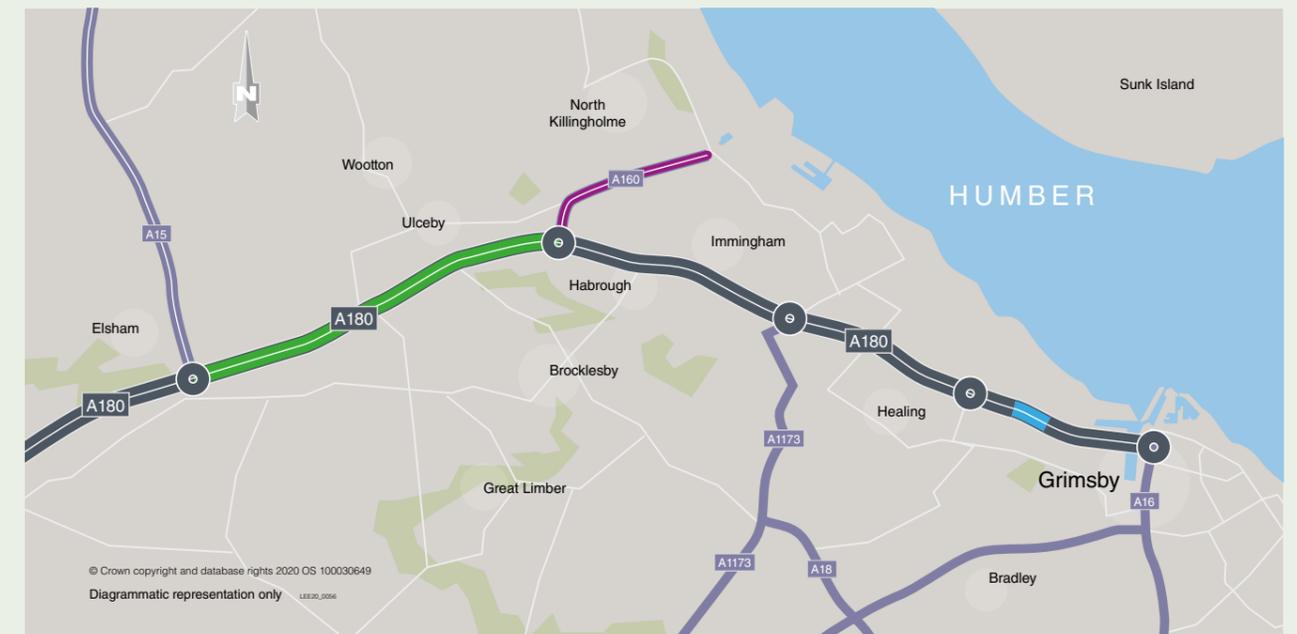

"The new junction will serve as one of the primary roundabouts providing access to new villages on the emerging housing development in the area and will alleviate congestion issues around the existing Berkeley Circle roundabout in Scunthorpe.

"This is the first key element of an ambitious wider scheme which, in addition to creating new homes, has the potential to house a new hub for advanced manufacturing, providing high-skill job opportunities for North Lincolnshire and the surrounding area."

The work will take 48 weeks and is being carried out by ESH Construction Ltd. Procedures are in place to ensure they work safely in the current environment.

Below you can see where improvements will be made along the route. Turn over for more information about these schemes.

## The schemes

- Concrete repairs
- Resurfacing
- Junction improvements
- Road markings and road studs
- Bridge maintenance

# Further work in the area

We're carrying out a series of further improvements in the area. These include:

- Resurfacing the M181 northbound carriageway starting in **July** for a month.
- Surfacing the M180 between junctions 3 and 4 in **September** for around two months.
- Replacing the roadmarkings and road studs on the M180 at junction 5 in **October**.
- Repairs to and resurfacing parts of the A180 carriageway between **September and January**.
- Renewing some of the road studs and roadmarkings on the A160 between Brocklesby and Mamby currently planned for **December**.
- Maintenance work on the bridge carrying Woad Lane over the A180 in **October** for three weeks.
